

Dear Candidate

Thank you for your interest in joining us at Telford College in this new senior leadership role.

You will be joining the College at a really exciting time as we are delighted to have been recognised as Good by Ofsted following a full inspection in February 2022. In addition, we have achieved Outstanding financial health putting us in a strong position to move forward with our strategic vision.

My vision for Telford College is that by 2026 it will be an ethical skills ecosystem for the Marches and West Midlands. We recognise and celebrate each other's collective strengths and collaborate together to maximise opportunities. The spirit of partnerships with shared ethics and values is key to our vision and our strategic plan prioritises contemporary teaching and learning, expanding learning opportunities, working in harmony with partners, investing in green activities and enhancing the local economy.

At Telford College, we put students first and they are at the centre of everything we do. We are fully inclusive for all, and we are proud of the diversity of our student community. We believe in supporting and celebrating all students, from every social background, every race, and every learning background.

We have a number of exciting projects, including our exciting plans for a new digital and maths hub in Telford's town centre which will help to upskill the workforce and make the borough more appealing to inward investors.

We are now seeking a Vice Principal Finance and Resource to provide strategic and senior leadership to the business support functions of the College. We are looking for a leader with moral purpose, who puts students first and has an unwavering commitment to pursue achievement for all. This really is a fantastic opportunity to drive a truly inclusive student-focused agenda. If you have the skills, experience, and ambition we are looking for, I look forward to receiving your application.
